Project Proposal Year IV

Student Name :	Rebecca Hollidge	Student Number:	C00300511
Working Title:	Bugging you		
Description :	Bugging you is a bug catching game. You play as a character collecting bugs. You enter different terrains that will have different mechanical problems to solve in order to find bugs to study. Each bug you keep is added to a terrarium which you then learn facts about the bugs. The intention is to make it as an RPG. As you walk throughout an area bugs will pop up as random encounters and the player can chose to keep it or to let it free. To catch the bug the player must study the bugs behaviour and engage with the game mechanics. There are a set number of bugs making the goal to collect all in each area to complete the game.		
Reasons for selecting project:	I have always wanted to develop a game in a cozy genre. I also get to work with a new software I haven't yet.		
Proposed research content:	For this project I will need to research the different types of bugs and where they are from to make the game realistic and educational https://www.researchgate.net/publication/401645116_COUNTDOWN_TO_2010_CAN_WE_ASSESS_IRELAND'S_INSECT_SPECIES_DIVERSITY_AND_LOSS . I want to make a game that fits within the "cosy game" genre. I want to learn how to create that environment to elicit the reaction that comes with playing that type of game. https://www.researchgate.net/publication/398861856_Curled_up_with_a_good_game_A_survey_study_on_personality_traits_and_game_motives_of_cosy_game_players This includes the development towards the aesthetic aspects. https://www.researchgate.net/publication/349524581_Towards_the_aesthetics_of_cozy_video_games
